

OVERVIEW

Our rope caulk is an effective alternative to tube caulking. Unlike tube caulking, application requires no caulk gun or messy clean up. Simply separate a strand of the rope caulk and press the self-stick caulk into place with your fingertips. It is an excellent weather-sealing product and helps seal out drafts in small gaps, providing an easy caulking solution on doors and windows without mess. This product will not harden or dry out. It is great for a do-it-your-selfer and a perfect addition to weatherization kits.

KEY BENEFITS

- Easy to use
- Will not harden or dry out
- Effective weather-sealing
- Ideal for weatherization kits
