

OVERVIEW

Our kerfed door seal is composed of open-celled foam and polyethylene liner, which provides maximum long-term performance with low compression force and resistance against compression set. These door seals retain their original shape year after year to maintain an excellent weatherseal. They fit easily into most door kerfs. The dual durometer insert allows for easy insertion and maximum retention. They are removable without damaging jamb or seal.

SPECIFICATIONS

CATALOG #	COLOR	DIMENSIONS	CASE QTY
