

OVERVIEW

Insulating hot water heater tanks can reduce standby heat losses by 25%–45%, saving around 7%–16% in water heating costs. Our Hot Water Heater Tank-Insulating Wraps have a white vinyl-facing and are made from appliance-grade fiberglass insulation. They include specially formulated adhesive tape and easy-to-follow instructions. The wraps made for electric heaters also include an insulating top.

KEY FEATURES

- Easy to install
- Includes specially formulated tape for securing to water heater
- Meets and exceeds U.S. Department of Energy standards

ORDERING INFORMATION

MODEL #	DESCRIPTION	R VALUE	CASE QTY
TW011	3" x 48" x 87" (For electric water heaters)	R10	4
TW008	3" x 48" x 75" (For electric water heaters)	R10	4

R-VALUE

R-value references resistance to heat flow. The higher the R-value, the greater the insulating power.

INSTALLATION INFORMATION

To install, wrap insulation around water heater. If needed, use scissors to cut down to size. For electric water heaters, the insulating top may be used. Use included adhesive tape to secure.
