

PLE-100 FC

100% SOLIDS FAST CURE EPOXY

DESCRIPTION AND USES

Citadel® PLE-100 FC is a fast-cure general purpose epoxy that provides outstanding customer value. Its great value, fast dry time, and low odor formulation makes PLE-100 FC ideal as a primer/basecoat for decorative chip and quartz broadcast applications that can be completed in one day.

PRODUCT FEATURES AND BENEFITS

- Versatile - Direct to Concrete
- Fast recoat
- Low odor 100% solids
- Moisture tolerant
- Chemical resistant
- Compliant nationwide with near zero VOC

PRODUCTS

SKU	DESCRIPTION
393811	Light Gray 3-Gallon Kit
393812	Armor Gray 3-Gallon Kit
393813	Dunes Tan 3-Gallon Kit
393814	Clear 3-Gallon Kit
393815	Custom 3-Gallon Kit*
393838	Clear 15-Gallon Kit*
393839	Light Gray 15-Gallon Kit*
393840	Armor Gray 15-Gallon Kit*
393841	Dunes Tan 15-Gallon Kit*
393842	Custom 15-Gallon Kit*

*Made-to-Order only. Contact Rust-Oleum Customer Service for details.

PRODUCT APPLICATION

READ ALL INSTRUCTIONS CAREFULLY BEFORE STARTING PROJECT

SURFACE PREPARATION

NEW CONCRETE: Laitance must be removed by diamond for a minimum of 28 days. The concrete must be structurally sound, dry, and free of grease, oils, dust, curing compounds and other coatings or contaminants. Surface laitance must be removed. The preferred method of surface preparation is to mechanically abrade the floor by diamond grinding or shotblasting to achieve a final CSP-3 according to ICRI. If patching is required, use Fortification Formula concrete repair.

MOISTURE VAPOR BARRIER: A suitable moisture barrier must be in place for concrete slabs on-grade. If a moisture barrier is not in place, seasonal variations in ground moisture can cause excessive moisture vapor transmission (MVT) regardless of results measured prior to coating application. For 16 mils of PLE-100 FC, the MVT rate must not exceed 10 pounds per 1,000 square feet per 24 hours, as directed by ASTM F1869. The relative humidity (RH) of the slab must not exceed 80%, as directed by ASTM F2170.

PRODUCT APPLICATION (cont.)

SURFACE PREPARATION (cont.)

MOISTURE VAPOR BARRIER (cont.): If there is a moisture situation in excess of the above rate, the use of Citadel Ultra Hydro Stop Moisture Vapor Barrier Primer may be required. Consult a Citadel Representative for details.

PREVIOUSLY COATED: Previously coated surfaces must be sound and in good condition. Smooth, hard, or glossy finishes should be scarified by sanding or sweep blasting to create a surface profile. PLE-100 FC is compatible with most coatings, but a test patch is suggested.

NOTE: Concrete must be visibly dry at time of application.

MIXING EQUIPMENT

Low speed drill and spiral mixing wand. Must pre-mix prior to use. **Important:** Hand mixing will produce inconsistent results and is not an approved method.

Note: 3-gallon kits are packaged in Citadel's new and exclusive All-In-One packaging. Both A and B components are shipped together inside an outer 5-gallon pail that can be used for combining both components at the application site. For best results use narrow spiral paint mixer (SKU:388011) to premix individual components within the 3-gallon kits.

MIXING

Note: Before starting, ensure that the material, concrete surface, and the ambient air are all at 40-90°F. Mixing ratio is 2 parts by volume of Part A to 1 part by volume of part B.

Pre-mix both A and B sides prior to combining.

Add part "A" to the mixing container.

Add part "B" to the mixing container and mix for 3 minutes.

TINTING (Clear)

Pre-mix Universal Tint Packs prior to adding into floor coatings. Add Universal Tint Packs at 8 oz. per gallon of mixed floor coating material and combine thoroughly via power mix to achieve uniform colorant dispersal.

Note: Some colors, including safety colors, may require additional coats if desired coverage is not achieved in the first application.

NOT FOR USE IN WATER BASED COATINGS

APPLICATION EQUIPMENT

24" notched squeegee

18" short nap lint free roller

PLE-100 FC

100% SOLIDS FAST CURE EPOXY

PRODUCT APPLICATION (cont.)

APPLICATION

Mix only what you can squeegee and back roll within 15 minutes (approximately 1 gallon of mixed material per crew of two applicators wearing spiked shoes). Do not aerate the mix.

Before starting, ensure that the material, concrete surface, and the ambient air are all at 40-90°F. Do not apply in direct sunlight or when temperature is rising. Wearing spiked shoes, immediately pour mixed PLE-100 FC on the floor in ribbons. Spread using a squeegee and then back roll using a short nap lint-free roller.

If priming is required, PLE-100 FC can be thinned up to 10% by volume with xylene and squeegeed tight to help fill small voids. Refer to recoat window below for best practice when abrading and/or applying subsequent coats.

CLEANUP

Clean Tools and application equipment immediately after use with active solvent like xylene (in SCAQMD use acetone only). Clean spills or drips while still wet with solvent. Dried product will require mechanical abrasion for removal.

LIMITATIONS

Do not apply if water or ice is present. Lower temperatures will slow cure time. Do not store PLE-100 FC at temperatures below 40°F or above 90°F. **PLE-100 FC will yellow upon prolonged exposure to sunlight or high intensity artificial lights and should not be used as a clear coat over decorative quartz or flake.**

PERFORMANCE CHARACTERISTICS

COMPRESSIVE STRENGTH

METHOD: ASTM C695

RESULT: 7,500 psi @ 24 hours and 9,800 psi @ 7 days

TENSILE STRENGTH

METHOD: ASTM D412

RESULT: 4500-5200 psi

BOND STRENGTH TO CONCRETE

METHOD: ASTM D4541

RESULT: >600 psi

TABER ABRASION

METHOD: ASTM 4060, CS 17

RESULT: Loss/1000 cycles = 36 mg.

FLAMMABILITY

METHOD: ASTM D635

RESULT: Self-extinguishing

WATER ABSORPTION (24 HOURS)

METHOD: ASTM D570

RESULT: <0.5%

KÖNIG HARDNESS

METHOD: ASTM D4366

RESULT: 120

TENSILE ELONGATION %

METHOD: ASTM D638

RESULT: 20-30%

PERFORMANCE CHARACTERISTICS (cont.)

MONOLITHIC SURFACING

METHOD: ASTM C722

RESULT: Pass

IMPACT RESISTANCE

METHOD: ASTM D2794

RESULT: Pass

PLE-100 FC

100% SOLIDS FAST CURE EPOXY

PHYSICAL PROPERTIES

		PLE-100 FC 100% SOLIDS FAST CURE EPOXY
Resin Type		Amine cured Epoxy
Pigment Type		Varies depending on color
Weight	Per Gallon	8.4-10.4 lbs.
	Per Liter	1.0-1.3 kg
Solids	By Weight	100%
	By Volume	100%
Volatile Organic Compounds*		<50 g/l
Recommended Dry Film Thickness (DFT) Per Coat		8-16 mils
Recommended Wet Film Thickness (WFT) Per Coat		8-16 mils
Practical Coverage (assume 15% material loss)		100-200 sq. ft./gal. Coverage rates will vary based on application method.
Mixing Ratio		2A: 1B
Working Time		15 minutes (Mix and empty bucket immediately)
Re-Coat Window (Min./Max)		3 hours/8 hours, scuff sand after 8 hours
Dry Times at 77°F (25°C) and 50% Relative Humidity	Tack Free/Recoat	3 hours
	Vehicle Traffic	24 hours
	Full Cure**	7 days
Shelf Life		2 years
Flash Point		>200°F (93°C)
Safety Information		PROTECT FROM FREEZING For additional information, see SDS

*EPA Method 24 Floor Category

**Coating achieves its full physical and chemical resistant properties.
