TECH SPECS

# CI PRO/CLOSE™

## CLOSING SYSTEMS FOR FRICTION TOP CANS, LUG COVER PAILS AND PLASTIC PAILS

Improve Your Filling Line Productivity with a CI PRO/CLOSE™ System

- Increase your uptime.
- Close a wide range of containers with the same closer. Closing systems built to accommodate your applications.
- Filling and closing of your products and containers on an integrated line.

Buy a CI by ODEN® Liquid Filler “Risk Free”

For added value Oden takes the 'risk' out of buying a liquid filler. You will receive written performance guarantees for each product submitted for free product testing.

Guarantees incorporate speed, accuracy and no-drip machine performance.

Send us your products and containers and take advantage of this free service. Call today to make arrangements.

Automatic Pressure Closer

### STANDARD FEATURES FOR PRESSURE AND CRIMPING CLOSURES:

- Closing heads available for all standard size “UN” style 22/24 gauge or 26/28 gauge metal pail lids. Interchangeable for closing a variety of pail sizes. Closing head for plastic pails (with “burper”) also available.
- Manual, semi-automatic and fully automatic units available.
- Systems are easily adjustable to different container sizes.
- All heavy duty stainless steel construction.
- Available in Class 1, Division 1, Group D explosion proof configuration using the X-purge method.
- Easily integrate with Oden and CI filling machines.
- Automatic and semi automatic configurations include conveyor.

Automatic Belt Closer

### STANDARD FEATURES FOR ROLLER OR BELT CLOSERS:

- Fully automatic systems for closing most friction top and press on lids.
- Models available for closing containers ranging from 9” to 20” in height.
- All heavy duty stainless steel construction.
- Easy height and guide adjustment for quick changeover.
- Full automatic conveyor system.
- Minimal maintenance requirements.
- Available in Class 1, Division 1, Group D explosion proof configuration using the x-purge method.
