

ABOUT CROWN7

Crown7 is a leader in the electronic cigarette industry with 12 years of experience. Having links with the best and most reputable manufacturers, we are specialized in offering high-quality products to consumers. Our main specialties are vape products as well as related accessories and kits, but we recently added CBD to our product line.

WHY IS CROWN7 BETTER THAN OTHER E-LIQUID VENDORS?

We understand that quality customer service is the stronghold of every successful business. To this end, we are committed to providing the best service to our consumers. Our products carry a 6-month warranty that covers any manufacturer defects, and we appreciate feedback that can help us improve our products to meet your diverse demands.

For any product inquiries, comments, or concerns, please call or email and we will promptly respond.

Our hours are 8:00 am- 5:00 pm from Monday-Friday and all phone calls and emails will be answered the same day they are received or the next business day if received after 5:00 or over the weekend.

WHAT IS CBD?

CBD, also known as Cannabidiol, is one of over 100 chemical compounds found in cannabis sativa plants. As one of the most active compounds next to THC, it has been shown to have a therapeutic effect on the human body. The effect of CBD on the body is linked to its interaction with the CB1 and CB2 receptors in the endocannabinoid system which enables it to influence mood, pain, appetite, sleep, immune response, and memory.

WHAT IS ISOLATE CBD?

It might please you to know that all our products contain isolate CBD. Isolate CBD is CBD in its purest form containing no other cannabinoids or toxin. It is 99.9% CBD.

ADVANTAGE OF CBD ISOLATE

Since CBD Isolate contains only the cannabinoid molecule extracted from the cannabis plant, this means that it is 100% free from toxins. This form of CBD is also perfect for Pharmaceutical agencies since they will be able to measure the exact dose of CBD needed for medicinal processing.

IS CBD LEGAL?

YES! The 2018 Farm Bill that overwhelmingly passed in the U.S. Senate has now become law. For hemp growers and CBD-product manufacturers the big news is hemp will no longer be equated under drug laws with its psychotropic cousin, marijuana, hemp cannot contain more than 0.3 percent THC (the main psychoactive element in cannabis)

CAN CBD GET ME HIGH?

No. As mentioned earlier, the main psychoactive element in cannabis is THC, which induces a high when consumed. CBD does not contain any psychoactive properties; hence, it cannot produce a mind-altering effect.

WHAT IS THE PRESCRIBED DOSAGE?

Each Crown7 tanks holds 1ml of CBD liquid, each tank is equal to 10mg of CBD. Be sure to seek your doctor's advice for dosage guidelines, especially if you are currently on medications. Factors such as age, body weight, and current health state can affect the effects of CBD on your body metabolism.

VAPING CBD

Vaping involves the use of electronic cigarettes or similar devices to create vapor, which is then inhaled by the user (vapers). E-cigarettes, also called e-cigs, are smoking devices which come with cartridges to hold the liquid that is heated to create vapor.

Vaping is a discreet way to take CBD and is very likely the fastest way to experience relief. As an added benefit, it is easy to carry a vape pen around with you when you are on-the-go. Since the CBD product is not burned (combusted), it doesn't produce harsh smoke. Instead, you inhale a soothing vapor, which is easier on the throat and lungs.

ADVANTAGE OF VAPING CBD

Each CBD delivery method creates a specific level of bio-availability. This refers to how much CBD content can actually get absorbed into your bloodstream. Vaping happens to have the highest bio-availability, a fact recognized by drug companies. CBD vape juice can provide similar results to edibles and oral tinctures while requiring you to use less product, making it one of the most efficient delivery systems for cannabidiol.

CBD capsules and edibles – 5-15%

CBD tinctures – 20-30%

CBD vape oil – 40-50%

So, if you vape 10 mg of CBD, your body can only absorb 4-5 mg of it. Keep this in mind when calculating your dosage. If you happen to change your method of delivery, you'll need to adjust your dosage according to its bio-availability.

our CBD vape juice does not contain nicotine, is not addictive and comes in a range of different flavors.
