

Oily Skin

Janssen Cosmetics' oily skin collection is focused on normalizing oil in the skin, as well as reducing blemishes, blackheads, and enlarged pores.

Olive leaf extract (oleanolic acid) suppresses sebum production over the long term

Salicylic acid is present in the Normalizing Skin Complex and Tinted Corrective Balm fights bacteria and removes pore-clogging dead skin cells. (Avoid if allergic to aspirin or if you are pregnant.)

Basic Protocol

Step	Product	Usage
1. Cleanse	Eye Makeup Remover	To ensure pores are clean, remove makeup with Eye Makeup Remover, a gentle oil-like gel which can be used all over the face. Apply with a cotton pad and hold over eyes before stroking from the roots to ends of the eyelashes.
	Clarifying Cleansing Gel	This gentle cleanser removes impurities without irritating the skin. Spread cleanser over skin with moist hands. Rinse off with water.
2. Tone	Purifying Tonic Lotion	This refreshing tonic removes residues after cleansing, balances the pH, and prepares skin for subsequent treatments. Use after the Clarifying Cleansing Gel and before the Bio-Fruit Gel Exfoliator.
3. Exfoliate	Bio-Fruit Gel Exfoliator	Once or twice a week, the Bio-Fruit Gel Exfoliator uses fruit acids to remove excess dead skin cells, reducing blackheads and spots. Use after cleansing in the evening. Spread over face and neck, avoiding eyes, and leave on for 5-15 minutes. Massage briefly with moist fingers and rinse with water. Follow with night cream. Can cause UV sensitivity, so protecting skin with Face Guard during the day is essential.
4. Moisturize	Clarifying Cream Gel	The Clarifying Cream Gel is a water-based gel cream that regulates sebum production while providing light moisture. Apply morning and evening and massage in gently.
5. Protect	Face Guard SPF15	This lightweight sunscreen protects skin from sun damage such as spots and premature wrinkles. After your day cream, evenly apply Face Guard over skin.

Advanced Protocol

Step	Product	Usage
------	---------	-------

1. Cleanse	Eye Makeup Remover	To ensure pores are clean, remove makeup with Eye Makeup Remover, a gentle oil-like gel which can be used all over the face. Apply with a cotton pad and hold over eyes before stroking from the roots to ends of the eyelashes.
	Clarifying Cleansing Gel	This gentle cleanser removes impurities without irritating the skin. Spread cleanser over skin with moist hands. Rinse off with water.
2. Mask	Purifying Mask	Once or twice a week, deep cleanse skin with our Purifying Mask. White china clay draws out impurities and absorbs oil, while olive leaf extract controls oil production. Apply onto cleansed skin, avoiding eye area. Leave on for 20 minutes, and remove with moist, warm clothes or sponges. You may use this mask more frequently on blemishes.
3. Tone	Purifying Tonic Lotion	This refreshing tonic removes residues after cleansing, performs extra cleansing by killing bacteria that causes breakouts, balances the pH, and prepares skin for subsequent treatments. Use after the Clarifying Cleansing Gel and before the Bio-Fruit Gel Exfoliator. Pour onto a cotton pad and sweep over face.
4. Exfoliate	Bio-Fruit Gel Exfoliator	Once or twice a week, the Bio-Fruit Gel Exfoliator uses fruit acids to remove excess dead skin cells, reducing blackheads and spots. Use after cleansing in the evening. Spread over face and neck, avoiding eyes, and leave on for 5-15 minutes. Massage briefly with moist fingers and rinse with water. Follow with night cream. Can cause UV sensitivity, so protecting skin with Face Guard during the day is essential.
5. Treat	Normalizing Skin Complex	This clinically proven concentrated treatment complex treats blemishes and blackheads with olive leaf extract, which suppresses sebum production, and salicylic acid, which opens pores, removes dead skin cells, and softens blackheads. Apply after cleansing and toning, directly onto problematic areas of the skin. Massage in gently. Follow with Clarifying Cream Gel.
6. Moisturize	Clarifying Cream Gel	The Clarifying Cream Gel is a water-based gel cream that regulates sebum production while providing light moisture. Apply morning and evening and massage in gently.
7. Cover and Treat	Tinted Corrective Balm	This tinted balm treats blemishes with salicylic acid and panthenol while camouflaging blemishes. Apply onto blemishes often to treat and conceal.
8. Protect	Face Guard SPF30	This medium weight sunscreen protects skin from sun damage such as spots and premature wrinkles. After your day cream, evenly apply Face Guard over skin.
