

RE: MOTOROLA PTX APPLICATION COMPATIBILITY DISCLAIMER

Klein Electronics' PTT accessories are engineered, offered, and sold to be compatible with the specific versions of Motorola-powered Push-to-Talk (PoC) applications available at the time of sale.

This includes Motorola WAVE PTX, AT&T Enhanced Push-to-Talk (EPTT), and Verizon Push to Talk Plus (PTT+), as well as their regional carrier-branded equivalents, Like Bell built on the Motorola/Kodiak platform.

Because Motorola Solutions and its partner cellular carriers independently control these applications and may modify, update, or alter their software architecture without prior notice, Klein Electronics cannot guarantee future compatibility beyond the application version active at the time of purchase.

By purchasing, the customer acknowledges and agrees to the following:

- **No Liability for Updates:** Klein Electronics is not responsible if future Motorola updates, code changes, or terminations render our accessories incompatible.
- **No Returns or Refunds:** We will not accept returns, issue refunds, or provide replacements for products affected by Motorola's software changes. Any such returns will be refused.
- **Payment Obligation:** The customer remains responsible for full payment of all purchased products, regardless of third-party software changes.
- **Superseding Clause:** This policy overrides any standard warranties or performance guarantees.

This disclaimer remains in effect until a written notice by Klein Electronics is issued.
