

## Instructions on how to use X-Mist Room Sanitiser and Deodoriser

### Read instructions before use

1. Prepare the room by cleaning and removing anything that can cause odours, such as food leftovers or soiled substances.
2. Remove pets and people from the area to be treated and close all windows.
3. Shake can well before use.
4. Choose a central location in the room, on the floor for the can. Place it on a clean cloth or a small towel to absorb any overspray.
5. Press down firmly on the total release valve until it clicks into place, the can will then automatically empty its contents.
6. Leave the room and close the door. Return after one hour.
7. Place used cans in the recycling bin.

Each 250ml can will cover a room of 5m x 5m.

### LARGER ROOMS REQUIRE ADDITIONAL DOSES FOR EFFECTIVE TREATMENT.

**Caution:** Once the outlet valve button is locked, the distribution of the contents of the spray can cannot be stopped until the can is empty.
