

COOLABAH

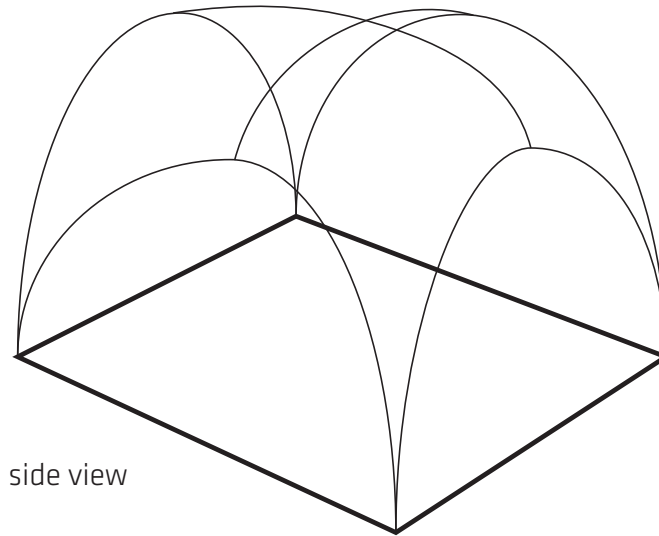

PITCHING YOUR SHELTER

1. You will need at least 2 people to pitch this shelter and it will be easier with 3 or 4 people.
2. Choose a flat site, clear away any sharp sticks or stones that may damage your shelter.
3. Lay out the canopy. Assemble the poles ensuring each section locks together to form continuous lengths.
4. The poles are colour coded. Match the poles to corresponding pole sleeves. The 4 long poles go at the edges and the 2 shorter poles go across the centre.
5. The four side poles should be assembled first. Insert the pole end into the pin and ring and push pole in to curve and secure each end. Once the side poles are in place the two centre cross poles should be secured, the centre of the shelter may need to be pushed up from the underneath in the centre to form an arc.
6. Peg the four corners to make a square with the ground level tapes, additional pegs can be placed over the tapes to prevent tripping.
7. Guy Ropes, are already attached to your shelter. It is important to securely peg out all guy ropes at all times as wind can easily damage your shelter.

Please Note:

Your shelter is not fire-proof, be vigilant around flames and fire. Be careful cooking inside on open flames, stoves should be positioned well away from fabric walls. This shelter is not designed or intended to be used as shelter for extended periods.

ESCAPE | EXPLORE | DISCOVER

COMPONENT CHECKLIST

- Canopy
- Fibreflex poles, 6 assemblies and pole bag
- Pegs & peg bag
- Guy ropes (already attached to tent)

DISASSEMBLY AND TENT CARE

Remove all pegs and clean them before they are put away. Remove all the poles by pushing them out, rather than pulling. Clean any dirt from the end ferrules. Fold these up and return to their carry bag.

Lay the canopy on the ground, fold it up, folding into the centre, until the width is the size of the carry bag. Then roll up, including the pole and peg bags in the roll.

If you must pack your shelter up when wet, dry out as soon as possible to avoid mildew damage.

The specifications of your tent may vary from what is shown as we are always working to improve and update our products.
