

E-COMMERCE KIT ASSEMBLY INSTRUCTIONS

LOZIER / STREATER COMPATIBLE

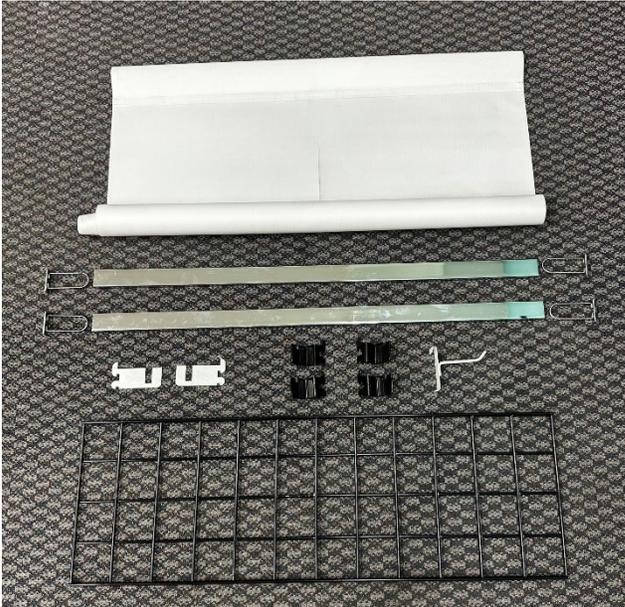

Designed Environments | 2025

E-Commerce Kit (Lozier/Streater)

Components needed:

- QTY 1 = 36" x 72" White Banner
- QTY 2 = 3' Rectangular Hangrod
- QTY 2 = Hangrod Bracket for Wall Mount
- QTY 4 = End Cap - Rectangular Hangrod
- QTY 2 = Grid Bracket Set for Wall Mount
- QTY 1 = 1' x 3' Grid Panel
- QTY 1 = 4" White Grid Hook

1. Open the box and gather all components.

2. Take the two hangrod wall mount brackets and hook them into the wall mounts, towards the top. Make sure the brackets are level with each other.

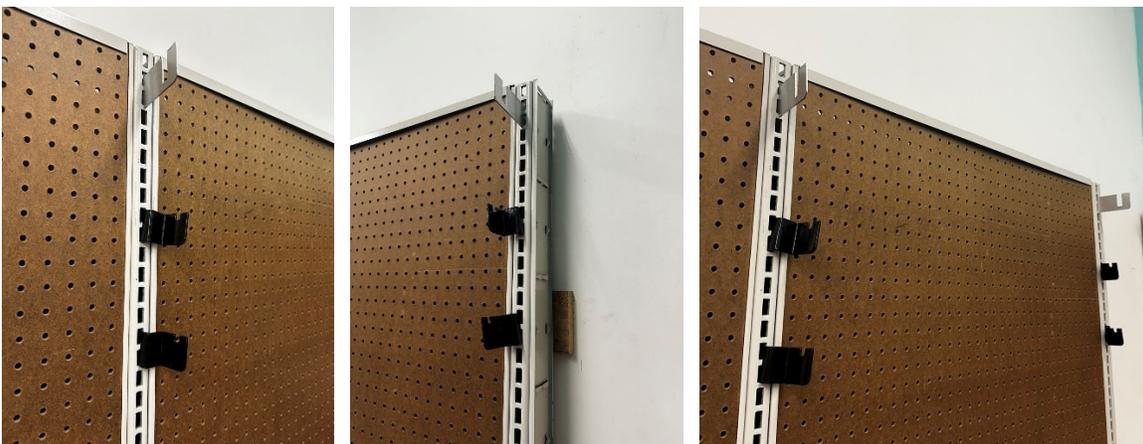

3. Locate the two 3' hangrods and your 36" x 72" banner and run one of the hangrods through each end of the banner.

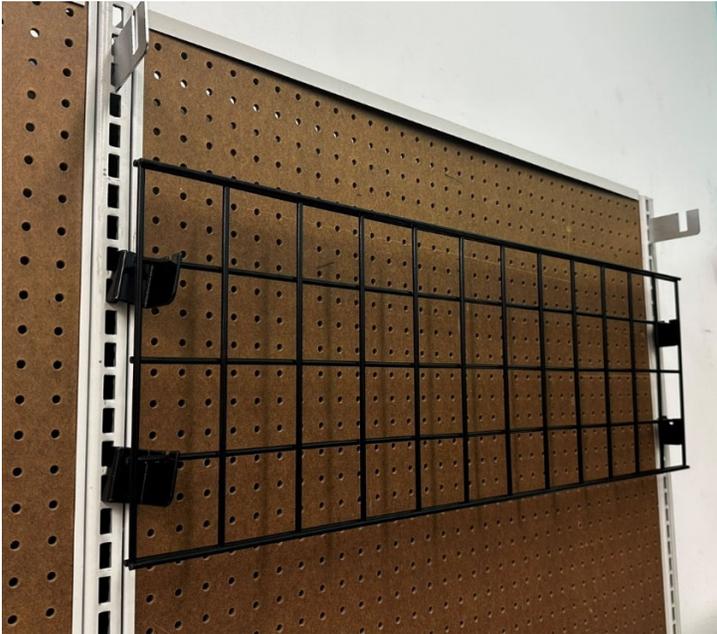

4. Put a hangrod end cap in each end of the hangrods.

5. Find the wall mount grid brackets and hook the top set into the wall mounts about 6"-8" below the hangrod brackets. Space the bottom set of brackets 6" from the top set (measuring from notch to notch).

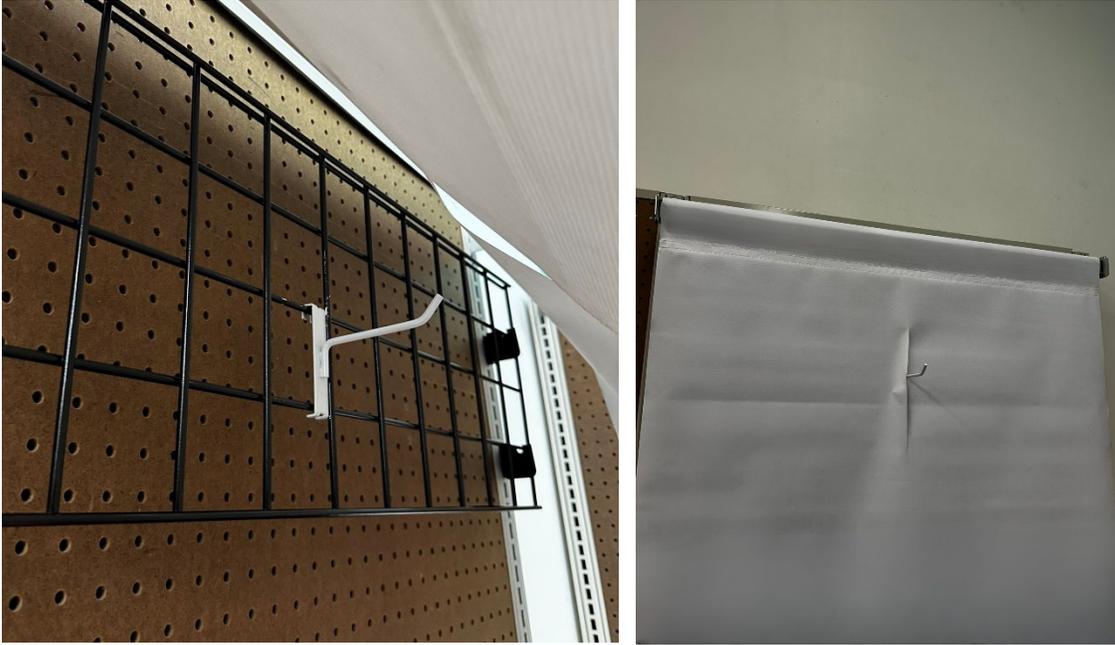

6. Place the 1' x 3' grid panel horizontally on the grid brackets. Make sure the wire of the grid is resting in the notch of each bracket.

7. Take the banner with the hangrods in it and hang it up using the slots in the hangrod brackets. Make sure that the end of the banner with the slit in it is at the top and the seams where the banner was sewn aren't facing out.

- Place the 4" white grid hook in the middle of the 1' x 3' grid panel and make sure it comes through the slit in the banner properly.

- Take a few steps back and make sure everything looks to be level and properly installed. You should not be able to see the grid behind the banner.
