

SECTION 1000 – GENERAL SPECIFICATIONS

LIGHTING

Proper lighting is critical in our retail stores and will not be compromised in any way.

The **Music Go Round** stores require:

- 100-Foot Candles in the selling and backroom areas.
- T-8/SP35/ Cool White
- Prismatic Lens (not Parabolic Lens)

To maintain this level of light, one 2'x4' three lamp fixture should be placed every 64 square feet, or 8' center to center.

Refer to the actual drawing for a typical lighting schematic.
