

SECTION 1000-GENERAL SPECIFICATIONS

LIGHTING

Proper lighting is critical in your retail store and it should not be compromised in any way.

The **Play It Again** store requires:

- 100-foot candles in the selling and back-room areas
- 200-foot candles over the checkout
- T-8, SP35 “Cool White”, color corrected lamps are recommended
- Prismatic Lens (not parabolic lens)

To maintain this level of light, one 2' x 4' three lamp fixture (or 8' two lamp fixture) should be placed every 64 square feet, or 8' center to center. Track lighting may be necessary to highlight specific areas. Refer to your store drawing for a suggested lighting schematic. Please note the lighting schematic provides good general lighting. City codes and current ceiling conditions are not necessarily taken into account. The lighting plan is not intended to be custom targeted lighting for the initial store design. Instead, it is designed for the best overall lighting coverage to flex with racking changes over the years. Be sure to review the layout with your electrician to best adjust lights to avoid potential dark isles.
